CHILLARIGE SAI DEDEEPYA

Hyderabad, Telangana, India | saidedeepya5@gmail.com |LinkedIn: https://www.linkedin.com/in/chillarige-sai-dedeepya/| GitHub: https://github.com/saidedeepya78

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience developing AI-powered applications, machine learning models, and data analytics projects. Proficient in Python, data preprocessing, predictive modelling, Generative AI, and explainable AI. Interested in building practical software solutions that solve real-world problems.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology

Stanley College of Engineering and Technology for Women, Hyderabad

2022 – 2026 | CGPA: 9.0/10

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

Data Science / ML: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, XGBoost, SHAP, LIME, SciPy

Tools / Frameworks: Streamlit, Flask, OpenCV, MLflow, Jupyter Notebook, Google Colab

Web / Visualization: MySQL, HTML, CSS, JavaScript, Matplotlib, Seaborn

WORK EXPERIENCE

AI/ML Intern | DRDO, Hyderabad | April 2025 – June 2025

- Developed a Python and FastAPI chatbot to automate regression analysis on technical datasets.
- Built predictive models using XGBoost and Lasso Regression for aerospace-related data.
- Automated data preprocessing, model training, and inference workflows to reduce manual effort.

SELECTED PROJECTS

AttentionX — Automated Content Repurposing Engine | Python, LLaMA 3.1, Groq API, Generative AI

• Built an AI engine to identify high-impact moments in long-form content and generate platform-ready social hooks; added virality scoring, emotion tags, and copy-ready export.

• GitHub: github.com/saidedeepya78/attentionx

AI-Powered Skill Assessment & Personalised Learning Plan Agent | Python, Streamlit, LLaMA 3.3 70B, Groq API

• Built a conversational agent to match resume skills to job descriptions, conduct adaptive interviews, score skills, visualize gaps, and generate personalized learning plans.

• GitHub: github.com/saidedeepya78/ai-skill-assessment

Seasonal Agriculture Performance Analysis | Python, Pandas, NumPy, SciPy, Matplotlib, Seaborn

• Analyzed 4,000 farm records across three seasons, eight states, and eight crops; used EDA and Kruskal–Wallis testing to compare performance and found water-use efficiency strongly associated with yield (r = 0.915).

• GitHub: github.com/saidedeepya78/Seasonal-Agriculture-Performance-Analysis
